PRODUCTS & SERVICES

logically secure

Logically Secure has provided cyber security products and services to global operation and domestic known brands for over 12 years.

We offer:

CYBERCPR® - INCIDENT RESPONSE MANAGEMENT TOOLKIT

CyberCPR® provides a safe, secure virtual global planning room environment from which incidents can be managed on a need-to-know basis.

CyberCPR® Enterprise is sold principally in the US, Europe and Australasia. Customers include police forces, banks, industry, consultancies, and other agencies. It is also mentioned in several SANS training courses to highlight, best practice, and processes.

HACKEDLIVE TRAINING

HackedLive© training utilizes the CyberCPR® Toolkit for a smoother coordinated response to malicious activities and simulates a network that needs defending in real-time, from real attackers using real tools. Previous customers comment on how well it mimics a real environment but making it a fun learning exercise at whilst learning at a fast pace.

PENETRATION TESTING

We offer a flexible penetration testing service that encompasses Cloud, Wireless, Network (Infrastructure), Web Applications, iOS, and Android apps as well as bespoke installations and hardware. In addition, we offer physical penetration testing services which include social engineering, cyber essentials and APT activity.

We often work with manufacturers, to help with security of their products. From time to time, this is simple regular black-box level testing against OWASP Top 10 or SANS 25. We have also had great success working alongside developers as the product evolves, providing testing and advice on elements throughout the development lifecycle. This includes working towards CIS and ASVS standards.

COMMUNITY AND EDUCATIONAL PROGRAMS

Logically Secure support civil and educational programs that require assistance from first hand industry practioners. Our support includes guest lectures, student learning support and research, and licensed incident response training modules (based on CyberCPR processes).

We provide CyberCPR® Community Version licence (1-3 user) for educators, small businesses and organisations.

CYBER ESSENTIALS

Logically Secure are registered Certified Bodies who can accredit companies through Cyber Essnentials and Cyber Essentials Plus. This is a recognised Government endorsed cyber security framework which helps businesses protect themselves against common methods of attack.
